

GAURAV VERMA

Senior Frontend Engineer · React · TypeScript · Design Systems

+91-7800561157 | gaurav.verma.1024@gmail.com | linkedin.com/in/gaurav-verma-1024 | Portfolio | Delhi, India

SUMMARY

Senior Frontend Engineer with 6 years of experience building scalable web applications using React, TypeScript, Redux, and Next.js. Experienced in frontend architecture, performance optimization, design systems, accessibility, and data-heavy applications. Built consumer products serving millions of users and internal platforms used by 100+ operations users, with end-to-end ownership from design through production.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, Semantic HTML

Frameworks & Libraries: React.js, Redux, Zustand, React Query, React Flow, Next.js, React Native, Tailwind CSS, Ember.js

Tools & Performance: Vite, Webpack, Git, CI/CD, Storybook, React Profiler, Core Web Vitals (LCP/CLS/INP), Code Splitting, Lazy Loading

Core Competencies: Frontend System Design, Design Systems, Component Architecture, Micro-Frontends, Accessibility (WCAG/ARIA), Agile/Scrum, Mentoring

CERTIFICATION

Agentic Frontend Development with Codex · Master.dev · Sep 2026

WORK EXPERIENCE

SDE-II (Frontend) · Spinny <i>Remote</i> - Architected and scaled a design system from scratch with 40+ reusable components, adopted by 3 product teams and reducing cross-team UI inconsistency. - Built an internal catalogue platform using React and Redux for 100+ inspectors/reviewers; multi-role approval workflows reduced data-publishing errors by ~40% and review cycles by 30%. - Engineered a drag-and-drop WhatsApp automation builder using React Flow, owning the frontend from workflow research and wireframes through production; shipped in ~4 weeks and replaced the third-party workflow used by the support team. - Led frontend performance work on Spinny's consumer experiences serving ~4M monthly active users, using profiling, code splitting, lazy loading, and render optimization to improve load speed and Core Web Vitals across key journeys. - Revamped Truebil's login and OTP flow using analytics and frontend profiling, simplifying the journey and reducing authentication drop-off from ~40% to ~6-8%. - Mentored 2 junior engineers and contributed to sprint planning, estimation, and technical decisions in a fully remote Agile team.	Nov 2021 – Feb 2024
Software Engineer (Frontend) · Brevo (formerly Sendinblue) <i>Remote</i> - Migrated a legacy JavaScript codebase to modular React and TypeScript, cutting component complexity by 35% and improving cross-module consistency. - Improved engineering onboarding and troubleshooting documentation, helping teams resolve recurring frontend issues faster and reducing dependency on tribal knowledge. - Used campaign analytics such as open and click-through rates to identify usability gaps and support data-informed UI improvements within Agile sprints.	Feb 2021 – Oct 2021
Software Engineer (Frontend) · Navyug Infosolutions <i>Noida, India</i> - Delivered client-facing React.js and React Native products across fintech and SaaS verticals, building accessible, responsive, and cross-browser user interfaces. - Maintained and enhanced DoPrep in Ember.js, shipping product features and UI improvements focused on user engagement and retention.	Feb 2018 – Feb 2021

CAREER BREAK & CONTINUED DEVELOPMENT

Feb 2024 – Present · Planned career break for UPSC Civil Services preparation while continuing frontend upskilling in React, TypeScript, frontend architecture, state management, and AI-assisted development workflows.

EDUCATION

B.Tech, Computer Science & Engineering · Dr. A.P.J. Abdul Kalam Technical University, Uttar Pradesh, India · 2014 – 2018
